

DODGE /// CHALLENGER

MOTOWN MUSCLE

WE IGNORE THE STATUS QUO AND DO THINGS OUR WAY. WE BELIEVE PERFORMANCE IS EQUAL PARTS ATTITUDE, PERSONALITY AND HORSEPOWER. HIGH PERFORMANCE IS OUR BIRTHRIGHT AND DEFIANCE IS IMPRINTED ON OUR DNA.

LEADER OF THE PACK

CHALLENGER R/T SCAT PACK // Direct from the factory Challenger boasts cold air induction along with a full floating, open-element Shaker hood scoop. The legendary 392 HEMI® V8 engine unleashes 362 kW and 644 N·m of torque for intense power. Four-piston Brembo® brakes, 3-mode Electronic Stability Control (ESC)^[1] with Full-Off Mode, high-performance suspension with Bilstein® shocks, 20x9-inch wheels and available Three-Season Performance tires work together to bring top-shelf control. The interior merges retro styling with modern technology. Race-inspired seats feature the famed Scat Pack logo embroidered on either standard high-performance premium cloth or available Nappa leather trim with Alcantara® suede inserts. Standard on the R/T Scat Pack model, Dodge Performance Pages feature everything from Launch Control to a g-force meter to drag-race timers. This real-time data can also be displayed on either the 8.4-inch Uconnect® touchscreen or the standard seven-inch reconfigurable digital display nestled between the gauges. For an even greater degree of personalization, Challenger R/T Scat Pack has customizable settings that can be accessed through the standard Uconnect touchscreen to give the driver the ability to adjust steering feel, transmission shift points and throttle response.

DODGE SRT® HELLCAT // IF YOU KNOW, YOU KNOW // When you have the guts to give drivers 527 kW and 881 N·m of torque and a staggering quarter-mile time, you get the glory of having arguably the most coveted car on the road. Challenger SRT Hellcat houses a Supercharged 6.2 SRT Hellcat HEMI® V8 engine with upgraded components to withstand the brutal performance. The Supercharger houses internal charge coolers and an integrated electronic bypass valve. The twin-screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and help improve overall performance. The air is delivered into Challenger's air box via the Air Catcher™ Inlet Port located in the driver's side parking lamp. A 92mm throttle body controls airflow into the supercharger and air charger coolers, and then into the inlet port. The Bilstein® Three-Mode Adaptive Damping Suspension on both models provides selectable driving dynamics settings that adjust shocks and transmission shifts to suit any drive – Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling). These Drive Modes tailor the driving experience by controlling horsepower, transmission shift speeds, paddle shifters, traction control and suspension settings. Drive Modes are pre-configured for Sport, Track and Default settings, while the Custom Mode allows the driver to configure their own unique driving experience.

HELL, YEAH

//// TRUE CLASSICS NEVER GO OUT OF STYLE // Challenger seamlessly melds retro styling with fierce attitude. It starts with a heritage split-grille surround, a power-bulge hood with functional inlets, and menacing projector headlamps with quad-halo LED surrounds that nod to the famed '71 model. From the rear, bold, seamless split LED taillamps finish off the intimidating stance. Slide inside and the heritage-inspired Houndstooth cloth seats or the available Nappa leather trim with Alcantara® suede seats take you back to a different era. The available front performance seats feature comfortable contours, and large side bolsters help provide maximum lateral support.

U.S. Uconnect® screen shown.

/// The only thing retro is the atmosphere; the tech is purely 21st-century. Challenger offers plenty of savvy features, including the seven-inch reconfigurable digital display gauge cluster. Buttons on the steering wheel let you scan through hundreds of different vehicle configurations and customize what information you see and how you see it.

Engineered with technology, Uconnect® brings a range of communication and entertainment services directly to your Challenger. Intuitive and customizable, available Uconnect systems include a touchscreen display up to 8.4 inches and steering wheel-mounted controls that operate features like a Bluetooth®-enabled phone, Voice Command,^[2] navigation, radio, cruise control, climate controls (from the touchscreen only) and more.

FEEL THE **FURY**

3.6 DOHC PENTASTAR® VARIABLE VALVE TIMING (VVT) 24V V6 WITH 227 kW This robust 3.6 V6 delivers 227 kilowatts, and an estimated six-second 0 – 100 km/h time. It's the combination of a TorqueFlite® eight-speed transmission, fully independent dual-cam phasing, sequential port fuel injection, and high-flow intake and exhaust ports that results in this exceptional blend of high torque and fuel efficiency.

5.7 HEMI® V8 WITH UP TO 280 kW, 555 N•m OF TORQUE equipped with the TorqueFlite eight-speed automatic (277 kW, 542 N•m of torque) and Fuel Saver Technology, eight cylinders transition to four when full power is not required to help provide an increase in fuel efficiency.

6.4 HEMI V8, 362 kW, 644 N•m OF TORQUE The available HEMI V8 delivers a performance feast – 362 kilowatts, 644 N•m of torque, an impressively flat torque curve and a 0 – 100 km/h time in the mid four-second range. Equipped with the TorqueFlite eight-speed, Fuel Saver Technology deactivates four cylinders if eight are not needed, creating a double threat of power and efficiency.

6.2 SUPERCHARGED HEMI SRT® HELLCAT V8 WITH 527 kW AND 881 N•m OF TORQUE Supercharged 6.2 HEMI SRT Hellcat V8 engine is the epitome of unrelenting muscle. With a monstrous 527 kW and 881 N•m of torque, there's nothing earthly about it. This beast features a TorqueFlite eight-speed automatic transmission and upgraded components to withstand the brutal performance.

POWER WITH THE CHOPS TO **BACK IT UP**

TRACK-PROVEN TUNED CHASSIS /// High-demanding track conditions require tightly engineered hardware. Challenger R/T Scat Pack and 392 HEMI® Scat Pack Shaker showcase a high-performance tuned chassis that's ready to go.

SHOCK ABSORBERS /// Bilstein® high-performance shock absorbers are precision-damped to provide a confident, smooth ride for the everyday commute while being fully capable for weekend track duty.

SUSPENSION /// Options range from Sport-tuned to high-performance to the top-of-the-line competition suspension featuring adaptive damping. A bold combination of movement and staying power comes from a sophisticated suspension geometry and rear-wheel drive. Whether it's the everyday commute or more challenging driving situations, the independent five-link rear suspension is finely tuned to help provide superior handling and a comfortable ride. When the rubber meets the road, a lower unsprung mass helps maintain better tire contact with the ground and reduces road noise. Models equipped with a 6.4 HEMI V8 feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad – on par with some of the world's best-handling cars. The Bilstein Three-Mode Adaptive Damping System on Challenger SRT® models takes drivers from Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest, max handling).

AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY /// Performance handling requires maximum road-holding grip, and Challenger Scat Pack models deliver with aggressive front- and rear-camber geometry. Set at -1.2 degrees in the front and -0.75 degrees in the rear, Challenger is configured for high-speed cornering with its tires leaning inboard at the top relative to the body.

BRAKES /// Standard four-wheel antilock disc brakes provide solid stopping power. Brembo® brakes create superior cooling and fade performance courtesy of wind tunnel-designed brake cooling ducts that direct airflow to vented rotors for consistent stopping power.

IT SPEAKS THREE LANGUAGES
POWER, PERFORMANCE AND SPEED

///// The TorqueFlite® eight-speed automatic transmission helps deliver impressive fuel efficiency and world-class precision. Available Dodge Performance Pages, paddle shifters and standard Sport Mode help lower shift times from 350 to 250 milliseconds. SRT® models, when in Track Mode, reduce shift times even more, from 350 milliseconds down to 160 milliseconds for lightning-quick gear changes.

///// When the TorqueFlite is mated to the Supercharged 6.2 SRT Hellcat HEMI® V8, it's fortified to withstand the groundbreaking 527 kilowatts and 881 N·m of torque unleashed by the engine. Enhancements include additional pinion gears and five more clutch pack discs.

392 HEMI

WELCOME TO THE SMOKE SHOW /// Like a predator laying in wait, stalking its prey, Challenger SRT® Hellcat is just waiting for you to unlock the full potential of 527 kilowatts with your Red key. The Dodge Challenger SRT Hellcat is propelled by the Supercharged 6.2 SRT Hellcat HEMI® V8 and offers a bewildering quarter-mile time of 10.8 seconds and a top speed of 320 km/h.*

*NHRA-certified 10.8 @ 126 with street-legal drag tires; 11.2 @ 125 with production tires.

RIP a

527 KILOWATTS
OF ADRENALINE

TOO DAMN FAST

CHALLENGER SRT® HELLCAT AND CHALLENGER SRT 392 // This Supercharged 6.2 SRT Hellcat HEMI® V8 lives up to the hype. The engine features a forged-steel crankshaft and induction-hardened bearing surfaces, a specially tuned crank damper tested to 13,000 rpm, high-strength forged-alloy pistons coupled to powder-forged connecting rods, high-load capacity bushings and diamond-like carbon-coated piston pins. Premium-grade heat-treated aluminum cylinder heads with die-cast aluminum rocker covers are optimized for superior thermal conductivity.

The Supercharger houses internal charge coolers and an integrated electronic bypass valve. The twin-screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and improve overall performance. Air is delivered into the engine's air box via the Air Catcher™ Inlet Port located in the driver's-side parking lamp. A 92mm throttle body controls airflow into the Supercharger and air charger coolers, and then into the inlet port.

With this kind of power, it's a given that the exterior demands exclusive extras like a Viper inspired aluminum hood, and a functional scoop flanked by a set of functional air extractors. Owners are handed both a Red and Black key at delivery. The Black key restricts power to 373 kilowatts, while the Red key unlocks the full 527 kilowatts.

Challenger SRT 392 shows its authority with a robust, naturally aspirated 6.4 SRT HEMI V8 engine with a powerful 362 kilowatts and 644 N•m of torque. Both SRT 392 and SRT Hellcat let drivers personalize their drive experience via the Drive Modes features: pre-configured Default, Sport and Track settings, as well as a Custom setting for a uniquely tailored experience.

Inside, both SRT 392 and SRT Hellcat sport a blend of premium materials, race-inspired technology and heritage-influenced design cues.

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA^[3] // This system displays the area immediately behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard.

PARKSENSE® REAR PARK ASSIST^[3] // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Available.

BLIND SPOT MONITORING (BSM)^[4] WITH REAR CROSS-PATH DETECTION^[3] // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons in the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection^[3] which monitors for vehicles and objects in perpendicular relationships to the vehicle while, for example, backing out of tight parking spots. Available.

ADAPTIVE CRUISE CONTROL (ACC)^[5] // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available.

FORWARD COLLISION WARNING (FCW) WITH ACTIVE BRAKING^[6] // FCW^[6] transmits audible and visual warnings. Radar and camera technology combine to alert you when the system senses potential frontal impact. Warning sensitivity can be adjusted to driver preference.

ELECTRONIC STABILITY CONTROL (ESC)^[1] // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC^[1] senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard.

RAIN-SENSITIVE WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC^[1] pump to precharge the brake system in order to decrease the time required for full brake application. Standard.

RAIN BRAKE SUPPORT // When your vehicle's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard.

HERE'S WHAT YOU CAN DO.

REMAIN FOCUSED ON THE ROAD WITH YOUR HANDS ON THE WHEEL, WHILE YOU COMMUNICATE, NAVIGATE AND STAY ENTERTAINED.

/// **DISCOVER** new places, find the best shopping, dancing, entertainment venues and restaurants /// **SPEAK UP** and be heard, send and receive calls and texts^[2] while driving safely with hands-free phone capability^[2] /// **NAVIGATE**^[8] to every adventure, get turn-by-turn directions so you don't get lost on the way (unless you want to) /// **START** your car from afar, get your engine running, unlock your door or flash your headlamps from almost anywhere using your smartphone

/// **APPLE CARPLAY™ COMPATIBILITY**^[9] This is smarter iPhone® integration, so you'll experience your favorite features through your dashboard. With Siri,^[10] all you have to do is ask – catch up on calls and messages, get directions from Apple Maps, or request a song through Apple Music. The system lets you browse music, or discover nearby gas stations, parking, restaurants and more. Plus, Maps help predict where you're headed.

/// **ANDROID AUTO™ INTEGRATION**^[9] For those who know and love Android,[™] Google[™] goes with you with navigation^[8] and "OK Google" voice detection, you'll hear your favorite Google Play music and get voice-guided navigation^[8] from Google Maps. Stay focused and productive while on the road with voice controls^[2] that allow you to make calendar appointments, set timers, reply to emails and messages – and more.

D O D G E

SRT

[1] No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. [2] Requires a mobile phone equipped with the Bluetooth Hands-Free Profile. Visit UconnectPhone.com for system and device compatibility. [3] Always look before proceeding, electronic drive aid is not a substitute for conscientious driving; always be aware of your surroundings.

[4] Always check visually for vehicles prior to changing lanes. [5] ACC is a driver convenience system, not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [6] FCW system is solely an alert system for the front of the vehicle which does not take any actions to change the vehicle dynamics to avoid a collision and is not a substitute for active driver involvement. The driver must remain aware of traffic conditions and be prepared to use the brakes to avoid collisions. [7] Voice Text Reply and Voice Texting features require a compatible mobile device enabled with Bluetooth Message Access Profile (MAP). iPhone and some other smartphones do not currently support Bluetooth MAP. Ensure MAP is ON and incoming message notification is enabled. Also requires the use of a compatible smartphone that supports text messaging and Bluetooth. Visit UconnectPhone.com for system and device compatibility. [8] This system is not meant to be used while the car is in motion. [9] Apple CarPlay and Android Auto require a compatible mobile device connected via USB cable to the Uconnect system. Data plan rates may apply. Visit UconnectPhone.com for system and device compatibility. [10] Siri Eyes Free requires an iPhone equipped with Siri. Certain features not available while the vehicle is in motion. iPhone must be within active cellular range. Customer's existing iPhone data rates apply to Internet-supported features.

-  Steering
-  Body mechanisms
-  Tires (only 2 years / 100'000 Km)
-  Air conditioning
-  Instrumentation
-  Safety and security

1. Always look before proceeding, electronic drive aid is not a substitute for conscientious driving; always be aware of your surroundings. 2 No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. 3 The Advanced Front Air Bags in this vehicle are certified to the new U.S. Federal regulations for Advanced Air Bags. Children 12 years old and younger should always ride buckled up in a rear seat. Infants in rear-facing child restraints should never ride in the front seat of a vehicle with a passenger front air bag. All occupants should always wear their lap and shoulder belts properly. 4 Based on latest available competitive information. 5 Apple CarPlay requires a compatible mobile device connected via USB cable to the Uconnect system. To use Android Auto on your car's in-dash display, you'll need an Android Auto compatible vehicle or aftermarket stereo, an Android phone running 5.0 (Lollipop) or higher and the Android Auto app. Data plan rates may apply. 6 Requires a mobile phone equipped with the Bluetooth Hands-Free Profile. Visit UconnectPhone.com for system and device compatibility. 7. Siri Eyes Free requires an iPhone equipped with Siri. Certain features not available while the vehicle is in motion. iPhone must be within active cellular range. Customer's existing iPhone data rates apply to Internet-supported features. 8 Voice Text Reply and Voice Texting features require a compatible mobile device enabled with Bluetooth Message Access Profile (MAP). iPhone and some other smartphones do not currently support Bluetooth MAP. Visit www.UconnectPhone.com for system and device compatibility. Ensure MAP is ON and incoming message notification is enabled. Vehicle must be registered for Uconnect Access and you must fulfill minimum subscription requirements. Also requires the use of a compatible smartphone that supports text messaging and Bluetooth. Check UconnectPhone.com for device compatibility.

About this catalog: AGT Europe Automotive Import SA has made everything possible to ensure that the content is accurate and complete by the time it was created. Since the time of printing, some of the information you'll find in this catalog may have been updated. Ask your dealer for details. Some of the equipment shown or described throughout this catalog may be available at extra cost. Specifications, descriptions, illustrative materials and all competitive comparisons contained herein are as accurate as known at the time this publication was approved for printing. AGT Europe Automotive Import SA reserves the right to discontinue models at any time or change specifications without notice or without incurring obligation. Options may be required in combination with other options. AGT Platinum Protection warranty program offers coverage for every new vehicle for at least 2 years / 100'000 km that can be extended. For the price of the model with the equipment you desire, verification of specifications contained here, or further general information, please check with your Dodge dealer.
